More than 4 years of experience as a Front-End developer building solutions for e-commerce platforms, ERP systems, and industrial mobile applications (PDA devices with ZEBRA scanners). Specialized in React, React Native, Next.js, and TypeScript. Experience as a Front-End technical lead, coordinating teams, collaborating with backend developers, and implementing development best practices.

PROFESSIONAL EXPERIENCE

B Life

Front-End Team Lead — Aug 2024 - Jan 2026

- Implementation and supervision of the GitFlow workflow, ensuring best practices for version control, branch management, and code quality.
- Review of pull requests and technical support to the team to ensure development standards and best practices.
- Definition and documentation of development processes to improve team workflows.
- Participation in defining technical solutions and decision-making.
- Continuous communication with internal teams as well as the Back-End team for requirement gathering and follow-up.

Front-End Developer — Feb 2024 - Jan 2026

- Development of front-end interfaces and features for e-commerce platforms and internal systems.
- Implementation of reusable components using React, Next.js, TypeScript, and TailwindCSS.
- Integration of interfaces with REST APIs for data consumption and management.
- Implementation of SSR and performance optimization in React applications by up to 40%.
- Development of internal mobile applications using React Native.
- Integration of product scanning using PDA devices with ZEBRA scanners.
- Collaboration with the Back-End team for service integration and definition of technical requirements.

SOLENCO

Full Stack Web Developer — Aug 2023 - Feb 2024

- Development of modules for an ERP system using Python and Django.
- Implementation of MVC architecture and development of business logic for different system modules.
- Development of a support ticket module with assignee assignment and notification system.
- Implementation of a billing module with XML file processing.
- Development of administrative dashboards for visualization of metrics, sales, and expenses.
- Development of the e-commerce interface using React, Redux, and Bootstrap.
- Integration between frontend and backend through the development and consumption of REST APIs.
